Loss Control, Engineering and Claims Services

Expert focus is given to helping insureds prevent losses and mitigate those that do occur. Services include:

Marine Loss Control Engineering (MLCE)

More than a dozen experienced loss control professionals spanning all time zones help policyholders reduce trade and transportation risks and minimize costly delays. Our comprehensive loss control services are based on three core principles:

- **Proactive loss prevention** – Helping clients avoid losses by analyzing potential exposures and minimizing them
- **Reactive loss control** – Helping clients prevent future losses by analyzing historical loss frequency and severity trends and acting to address vulnerabilities
- **Communication** – Maintaining open communication between policyholders and loss control professionals to enhance loss prevention efforts

Policyholders can also take advantage of the expertise of our independent surveyors and loss control experts who

specialize in infrastructure projects, cargo, towing, heavy-lift, logistics and warehousing.

Claims Services

Global Marine's network offers clients the best of both worlds. Our policyholders' customers can resolve claims in their own country, language and currency, while the original insured can liaise with regional management to address concerns or requirements. Our claims handlers' knowledge of international marine insurance law and conventions and local regulations enable us to resolve claims quickly and maximize recoveries, delivering tremendous benefit to our policyholders.

Comprehensive Recovery Support

Marine recoveries are central to our approach to claims. Local and regional recovery specialists focus on achieving maximum recovery on every claim. Such efforts help insureds maintain favorable loss experience and keep premiums down.
